INTERNATIONAL CONFERENCE

"TERRITORY, DIVERSITY AND COEXISTENCE"

Zaragoza (Spain)

October 25th and 26th 2018

Palacio de la Aljafería, Cortes de Aragón
Aula Magna, Facultad de Economía y Empresa
Universidad de Zaragoza

The International Conference “Territory, diversity and coexistence” is organized by the Manuel Giménez Abad Foundation, University Institute of Investigation on Migrations, Ethnicity and Social Development (IMEDES, Universidad Autónoma de Madrid) and the Group of Studies on the Society of Risk (University of Zaragoza). The Observatory of the Immigration in Tenerife also collaborates in the organization of the event.

This Seminar will be the final of the research project “Coexistence and multicultural neighbourhoods: Conflict and social cohesion in a Spain in crisis” (CSO2014-54487-R).

(https://www.uam.es/otroscentros/imes/proyectos_convivencia_PRM.html)

From 2015, this project had worked about:

- Dynamics of social fragmentation and deepening of spatial and social segregation linked to economic crisis in some neighbourhood of several cities in Spain.
- The importance of the neighbourhood as unit or as a frame of analysis to the understanding of sociability and its different spaces.
- The urban spaces like contexts of dispute between different uses.
- The visualization of informal networks of mutual support and the analysis of the urban resistance movements as footpaths to build alternatives facing neoliberalism in the management of neighbourhoods and cities.
- The complexity of the analysis of the sociability in neighbourhoods.

The general aim of the seminar is to provide a frame for the debate about coexistence in neighbourhoods with socio-culturally significant diversity. The event proposes a reflection based on research and also on social intervention. Our intention is to contribute to the generation of knowledge, to identify best practices and to get innovation in the field of politics, programs and actions in matter of fight against discrimination and promotion of equality and coexistence in neighbourhoods and cities

To aim these goals, the organization proposes two sections:

1.- **Habitat, diversity and coexistence.** This section includes questions like habitat as a frame and as a determinant question for territorial and socioeconomic inequality, fragmentation and social polarisation. Works presented in this section will be also focused on different kinds of urban violence originated in racism, xenophobia, gender and class inequalities. Finally, works presented will focus on home and neighbourhood as elements for integration and exclusion.

2.- **Practices for the promotion of coexistence and for fighting against inequalities.** This section will contribute to reflect on territorial inequality, mechanisms to invigorate communities and informal ways to resolve and manage “conflicts”. Works will pay special attention on the role of women in those questions. Interventions will focus also on public policies and wide strategies promoted by the group of actors that have influence on local coexistence, on the building of cohesion or agents that cause conflicts. Reflections will consider also projects, programs, actions and devices
